BELL'S PATENT LIQUID CEMENT is ready for use, and only one-eighth the cost of oil-paint. For basement it is unrivalled, giving the exact appearance of FINE CUT STONE. Can be used at once on fresh Roman Cement, or any other plastering, and will protect the walls as well as Roman Cement. In stucco of 1, 2, and 3 cwt. to the bag and 6lb. coals inclusive.

PATENT MINERAL PAINTS.

Invaluable for cheapness, beauty, and permanence: not half the cost of other paints, always ready for use, will keep good for years, and therefore well suited for exportation. Brilliant black, 8s.; rich browns, 9s. 6d.; greens and light colours, 4s. per gallon.

G. BELL and Co., 8, Wellington-street, Strand-street.

JOHNS and Co.'s PATENT PERMANENT STUCCO WASH, CEMENT, and PAINT.—The attention of the trade and the public generally is solicited to these very excellent and well-known materials, which, for their beauty, durability, inexpensiveness, and cheapness, are unequalled. THE PERMANENT WASH, as a substitute for common lime-wash or water-colour, is an article which has long been wanting for stucco and brick-work; it is of a stone colour, but may be tinted to any other; is perfectly dry in twenty-four hours; will not wash off; is very little dearer than the common washes; and, being a non-absorbent, is admirably adapted for railway stations, union workhouses, schools, hospitals, prisons, &c. One cwt. is sufficient to cover, with two coats, 100 square yards. THE CEMENT, from the great reduction in price, and its establishment for internal as well as external surfaces, places it above all other materials of its kind; it has no enamel resemblance, may be painted or papered in a few days; never blisters, cracks, or exfoliates; once becomes as hard as stone; and may be cleaned with a brush and water. The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information, may be obtained, on application to the Sole Agent, PHILIP HARE, at the Warehouse, 28, Steed-yard, Upper Thames-street. A liberal allowance to wholesale traders.

ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire, and, through long distance to sea, has often proved stale and unfit for use on its arrival in London. By the valuable improvement now made, the Cement will be manufactured in London, and thus presented to consumers in a fresh and genuine state, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of wood for shrivings, architraves, and panel mouldings, and for in-door floating, instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those cases where expedition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement and has the advantage over that material of wholly resisting frost. When used as a stucco it does not require to turn green in damp situations, and requires no colouring. Employed as an hydraulic mortar for brickwork, it carries four to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement with but one measure of sand. This superior cementing power, if united with its eminently hydraulic properties, points out as the fittest material for buildings on and among water, the lining of reservoirs, cisterns, and tanks, and for all those purposes where strength and a perfect resistance to water are required.

Manufacturers—J. B. WHITE and SONS, Millbank-street, Westminster, and 91, Sackville-street, Piccadilly.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Son of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. request reference to No. 288, page 481; and also Nos. 291 and 293, pages 543 and 591 of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cement, whereby the great superiority of that Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; it is stronger in its concentrated qualities, harder, and more durable than any other description of Cement; it does not vegetate, crystallize, or burn, grain, or blow in it. Offered by any manufacturer indiscreet whatever the ultimate, resisting alike the action of frost and heat. It is manufactured to set in from five to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Patent Cement Works, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also at their Depôt, 61, Hanover-street, Liverpool.

THE PARIAN CEMENT, for INTERNAL STUCCO.

No. 4, Porchester-terrace North, Paddington.
15th February, 1850.

Dear Sirs,—I have been reluctant to speak to the merits of Parian Cement, until sufficient experience enabled me to do so. As an extensive builder I have given it many trials, and now beg to express my perfect satisfaction with it. The house from whence I date was first inhabited by me on 9th September last, and a brick having been laid before the 1st of June;—that is to say, in three months and one week I had covered the walls throughout with Parian papered some, painted and marbled others; and the whole work has been dry and perfect from that hour. I need say no more.—I am, Gentlemen, yours respectfully,

WM. SCANTLEBURY.

Messrs. Chas. Francis and Sons, Nine Elms.

MARTIN'S PATENT
FIRE-PROOF AND ORNAMENTAL CEMENT,
APPLICABLE FOR
ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

This invaluable Cement has now been before the public so many years, and obtained so high a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. Messrs. STEVENS and SON however feel called upon to observe, that from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with other Cements for internal use, there will be found a gain of 140 per cent. in material, full 7 per cent. less in price, with an additional saving in labour of 10 per cent., by its allowing about forty minutes for working, being less than one-tenth of the time of other cements usually in use; therefore worked with greater facility, making together the enormous saving of full THIRTY THREE PER CENT.; the advantages therefore cannot admit of doubt. Specimens, showing its beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the Cement, in any quantity, obtained of Messrs. STEVENS and SON, at their Plaster and Cement Works, 198, Drury-lane, Junction of Broomsbury, Derwent Mill, Derby.

N.B. This Cement will receive paint or paper in a few hours after the completion of the work by the plasterers.

IMPORTANT TO OIL AND RAILWAY GREASE MERCHANTS AND FACTORS.

FOR SALE, at the Works at Weymouth, or may be delivered to any part of the kingdom, the superior product by distillation of BITUMINOUS SCHIST, or SCHISTUS "LIQUID BITUMEN," containing, 1st, a Volatile Oil, or Mineral Spirit; 2nd, an Oil of a greater density; 3rd, a Fatty Mineral Oil; 4th, Paraffine; 5th, Ozocene; slightly alkaline; 6th, Tar. The Volatile Oil, or Mineral Spirit, is admirably adapted as a solvent, and may be used for all purposes to which the most highly rectified spirit of turpentine is employed, or may be used for spirit and camphine lamps. The second oil, not so very volatile, will dissolve in any proportion with seed or fish oils, of which it considerably augments their illuminating power, and prevents their becoming rancid. The third is admirably adapted for lubricating machinery, and contains—the 4th, Paraffine, which is easily separated by crystallization, and receiving but little treatment is, make excellent candles. The 5th, Ozone, superior to animal oil or fat for the use of carriages. The 6th, Tar, perfectly black, very siccative, and which may be used generally for all purposes of varnish, and where mineral tar is required. Any further information may be obtained either of Mr. W. G. ROBINGHAM, Patent Works, Weymouth; or of Mr. G. F. CHEFFINS, 11, Southampton-buildings, Chancery-lane, London.
